AMK Air Compressor Air Dryer Repair Kit ' fitting instructions '

Dear Customer ,

Thank you for purchasing our Amk Air Dryer Repair kit ! Firstly please visit Youtube and key into the Youtube search bar the title 'AMK Air Compressor Air Dryer Filtration Replacement' illustrated in **Pic 1** and view the installation video for the main kit , **Pic 2** Shows the location of the small O ring in the kit, this O ring seals by compression not periphery some Amk Dryer units do not have this O ring fitted or provision for it to be fitted. **Pic 3** shows where the large O ring is located you will need to remove the silver round plate first by means of levering it out with a screwdriver ! Behind the silver round plate is a spring and none return valve assembly pictured in **Pic3** please note the position of this valve and spring and take care not to loose these parts , fit new Oring and then refit silver round plate ! inside of the silver plate is some pry out tags which stop the silver plate from having a loose fit you can bend these tags outwards a little so that when you refit the silver plate it as a tight fit and keeps the none return valve and spring assembly in its seating .
